

## CHAPTER XXIX.

## THE GOVERNMENT PHOTOZINCOGRAPHIC PRESS, POONA.

566. The Photozincographic Press, Poona, was originally created in the year 1867 to supply maps for the survey and revenue departments and was until recently in charge of the Settlement Commissioner and Director of Land Records, Poona. In the beginning, it was a very small press under an officer of the royal engineers. A specialist officer was appointed to take charge of it in 1885 and from that time onwards more up-to-date methods of reproduction have been introduced. Owing to the standardization of certain forms hitherto printed at this press, the printing of ordinary forms was transferred to the Yeravda Prison Press as recommended by the press committee in Government Resolution, General Department, No. 8723, dated 1st December 1913. The press was also allowed to undertake printing work of private bodies in competition with private presses. The system was subsequently considered undesirable by Government, who, however, allowed the press to undertake only such private work which would be of a highly specialised character, as was beyond the powers and capacity of local private presses, provided Government work thereby, is not affected in any way.

567. The principal work of the press is the production of maps and of copies of registered documents. The system of photo-copying of documents as worked out in the year 1913 by Mr. F. G. H. Anderson, as Settlement Commissioner and Director of Land Records and Inspector General of Registration, was introduced tentatively in some of the districts in this Province. This photo-copying system was found to be most successful and economical and most of the districts in the Province have now been brought under this scheme.

568. The main and important items of work executed by the press pertain to the departments of land records and registration and as such the Settlement Commissioner and Director of Land Records held the administrative charge of the press (*vide* Government Resolutions, Revenue Department, Nos. 3886, dated 14th April 1919, 10448, dated 7th October 1919 and 1460/33, dated 2nd November 1933).

569. With regard to the commercial side of the press, however, it was placed under the supervision of the Superintendent, Government Printing and Stationery, Bombay, with the following reciprocal arrangement:—

(1) The Manager of the Press—a gazetted officer—should advise the Settlement Commissioner and Director of Land Records in purely technical matters only and in important questions relating to the press establishments.

(2) The Manager should act under the orders of the Superintendent, Government Printing and Stationery, Bombay, in routine matters concerning the commercial side of the press and his proposals regarding

all important questions should be submitted to the Settlement Commissioner and Director of Land Records or to the Commissioner, Central Division, through the Superintendent, Government Printing and Stationery, Bombay.

(3) The Superintendent, Government Printing and Stationery, should visit the Photozinc Press at least twice a year and submit his report to the Settlement Commissioner or the Commissioner, Central Division.

570. The Survey and Settlement Commissioner was in the administrative control of the press until the year 1894, when the Commissioner, Central Division, was placed in charge of it. In the year 1907, the control of the press was retransferred to the Settlement Commissioner and Director of Land Records, until this post was held in abeyance. In the year 1932, the Commissioner, Central Division, again became the controlling authority of the press (*vide* Government Resolution, Revenue Department, No. 7266/28, dated 21st March 1932). But subsequently on the revival of the post of the Director of Land Records (*vide* Government Resolution, Revenue Department, No. 2844/33, dated 13th November 1935), this officer was reappointed as the controlling authority of the press. This arrangement continued for about four years when the control of the press (both administratively and commercially) was transferred to the Superintendent, Government Printing and Stationery, Bombay, with effect from 1st April 1940 (*vide* Government Resolution, Revenue Department, No. 4529/33, dated 25th September 1939).

571. In pursuance of the policy of Government, to indianize the superior service in the Government presses in the Bombay Province, the present manager who is in direct charge of the press was selected for training in England in the Photozincographic and allied processes and on his completing the training course in England and on his return to India was, in the beginning, appointed as assistant manager of the press and subsequently confirmed as manager in the month of July 1930. The Superintendent, Government Printing and Stationery, Bombay, is the controlling authority.

572. The photo-registry section, however, was to be under the administrative control of the Inspector General of Registration, Bombay Presidency, Poona, as hitherto (*vide* Government Resolution, Revenue Department, No. 1778/33, dated 17th April 1939).

573. The work done at this press includes the preparation of original maps in different languages, revising them, designing and reproducing colour charts including medical charts, school wall pictures in colour, anatomical pictures, certificates of merits, architectural drawings, diagrams for the scientific volumes published by the Indian Meteorological Department, the printing of daily weather reports, fine art productions of microscopical, medical, geological and archæological illustrations including the reproduction of natural colours from the actual objects themselves of articles of archæological interest, such as ancient vases, silk and embroidery work in silver and gold, carpets, etc.

574. Whenever any new work is received from a particular officer, Government orders are always communicated to the manager of the press as an authority for printing that work. Work received from various departments of Government almost every year is authenticated by the previous practice in general and in certain cases by Government orders received from time to time. The press, therefore, has not maintained any list of such standing orders on the record of the press.

575. All work received from Government officers, if it is for *bona fide* Government purpose, is done free of cost, treating the work as service work.

576. The press is also authorised to receive and execute work from other Governments, Government of India Departments, Native States, Local Self-Governments and other Private Bodies, provided Government work is not thereby affected in any way. The work executed in such cases is charged as per the schedule rates by issuing adjustment bills or bills for cash payment as the case may be.

577. The following is the list of officers of the Bombay Government from whom work is generally received by the press:—

- (1) All District Inspectors of Land Records.
